[ Dialectics, Complexity & the Processual ]

"Hegel's dialectics is not a theory of the excluded middle but rather a theory of operations. In a dialectical process, A and non- A are two instances co-existing at certain moments.

1/2

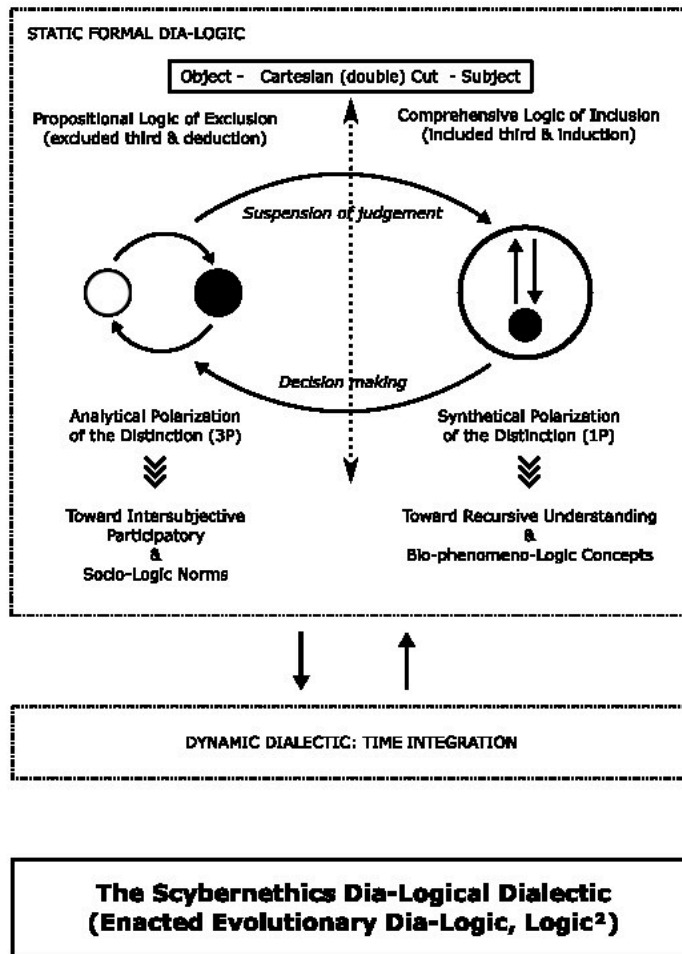

What is at stake, however, is not ambiguity but complexity; that is to say, reality embodies a complexity that cannot be reduced to numerical positivism or simple logicism based on the principle of contradiction." Yuk Hui.
