Tr

[ Conscience as a Second-Order Concept ]

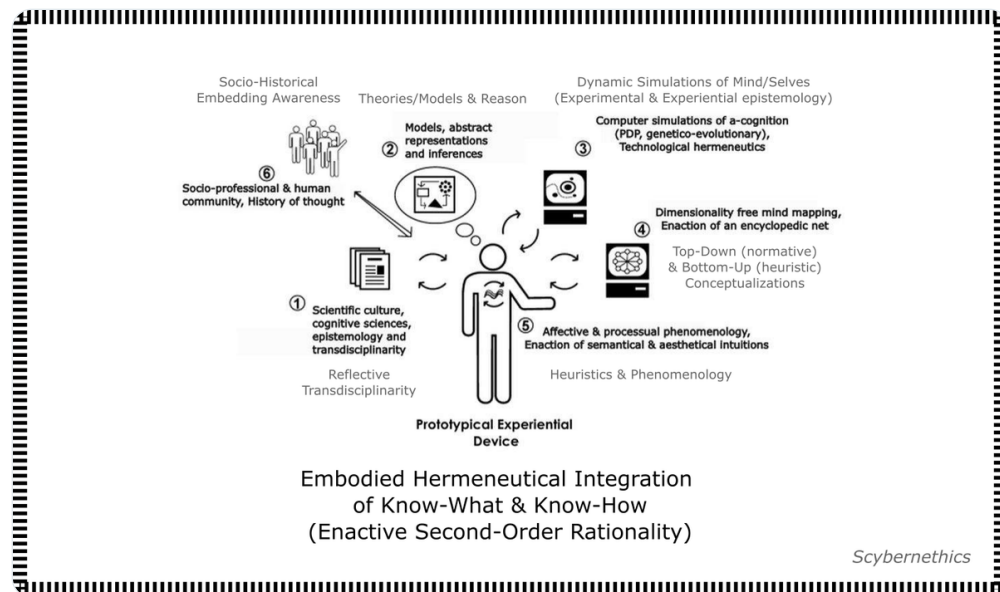

Conscience is the cognition of cognition AND the cognition of cognitizing (cognition<sup>2</sup>) leading to the cognition of the cognitizer, that is Self-cognition.

1/2

By studying consciousness, because of the "saturation of disciplinary domains", scientists try now to understand \*their own cognition\*. They are also doing \*implicitly\* reflective embodied phenomenology, while explicitly studying "agency" of others (for ex).

2/2
