[ Scybernethics & Autonomy²: History of Self Transformation ]

The history of life can be seen as the history of self-constitution, as the enaction of a "self". In this regard, human beings are the state of the living art, being able to define what it mean to "be human" and

to be conscious of it.

There is no "Science of Consciousness" without an historical and developmental (time dimenTionality) science of the self.

This is what I call second order/1P-3P autonomy<sup>2</sup>, encompassing the usual formal and static autonomy/heteronomy dipole through a co-determining hermeneutic dynamic circulation between culturally validated polarities.

(1P-3P Extended Perspective<sup>2</sup> & Regulation<sup>2</sup>)**

*N.B.: BidimenTional Perspective (1PP-3PP Epistemology) = Dual formal scientific & analytical pererspective + Synthetic embodied phenomenological lived experience through hermeneutical circulation and iterative co-determination.*
