[Are the Road to Hell...?!] 🍷

Cognitivism ("Relevance Realisation" mixed with "economic rationality") and "enactive-like" conceptions synthesized through the "agency" perspective to criticize computationalism.

<https://twitter.com/yoginho/status/1767248548867784839>

And the winner is...yes again...the ultimate universal Cartesianist conceptual-empirical glue 3P-Only: self-fulfilling conservative prophecy...sorry, "Predictive Processing" modeling!

Does no one see that statistical models are a mathematical equivalent of ANN/"Deep Learning" computer simulations, which will quickly instru-mentalize (the next step is obvious: AGL/Artificial General Life) and industrialize this design style once formalized,

contrary to the initial intention? Mathematics is not the (abstract) refuge but the *gateway to computationalist instrumentalization*. The technical system is a pharmakon: it feeds on its own contradiction!

Although I was in favor of RR's cognitivist approach aimed at reactivating ancient wisdom, I think we are on the wrong path here, which can only lead to intensifying, paradoxically, the problem of meaning and spread confusion.

Cognitivist/3P-Only approaches will only add fuel to the fire. For me, a 1P-3P scientific epistemology is the only remedy.

Fin.
